6" – 16"

Call us for special requests.

In stock inventory with sizes ranging from 5 to 55 feet and 6 to 16 inches.

Pole Product Lines...

Sierra Pacific Industries is a manufacturer of untreated Ponderosa Pine and Douglas Fir poles. Logs chosen for poles are pre-selected from the highest quality small log timber available. Limits are placed on knot size, taper and sweep. Poles are free from decay and bug holes.

Ponderosa Pine Poles...

Stock Utility Poles - All inventory conforms to ANSI (American National Standards Institute 05.1,2002). Any length five feet and longer can be cut upon request. Ponderosa Pine can be pressure treated with some of the most economical preservatives available.

Appearance Grade Poles - Stock is selected for straightness, lack of excessive taper, lack of severe machine nicks. Appearance stock conforms to ANSI standards.

Bright Appearance Grade Poles - Highest grade available combines all qualities of appearance grade poles and permits very light to no blue stain. Please call us regarding seasonal availability.

Douglas Fir Poles...

Stock Utility Poles - Inventory conforms to ANSI standards. Douglas Fir is the species of choice for most utilities in the western United States for electric transmission and distribution. For use as appearance grade building poles, consideration should be given to Douglas Fir's tendency for checking. Douglas Fir is recommended where strength is a primary concern.

Other Uses - Poles can be selected for use as piling, retaining wall posts, post and rail fencing, mine timbers, lighting standards, and playground equipment.
